

Case Study: Kelly Green Board, LLC Kelly Kraft Paper Board

Project: Offices and Restrooms
Location: Various Iowa DNR Sites
Date: 2013

Background:

The Iowa DNR enjoys the use of Kelly Green Board, LLC products because they finish like drywall, are highly abuse and moisture resistant and are made from post-consumer recycled materials. Protecting the resources of Iowa is one of the major tenets for the Iowa DNR and Kelly Green Board, LLC embodies that commitment.

Current and Future Projects:

*Otter Creek WMA
Three Fires SP Office/Shop
Cold Springs SP Office
Mt Ayr Fish Hatchery Storage
Wilson Island Office/Shop
EB Lyons Shop*

*Springbrook ADA Restroom
Council Bluffs Shooting Range
George Wyth Concession Building
Manchester Fish Hatchery
Lake Darling Cabins
Dolliver Office/Shop*

Highlights of the Installation:

Kelly Kraft Paper Board is used in restroom, shop and storage areas where abuse and high moisture is a concern and regular abuse and moisture resistant products are unattractive (FRP) or don't withstand daily commercial use. It is also applied to office walls (bottom left photo - partially finished and bottom right photo - finished) where a high level of abuse is inherent in the daily activities of the field staff. Regular abuse board does not withstand the wear and tear like the Kelly Kraft Paper Board plus you get the added benefit of mold and moisture resistance. The Iowa DNR also uses Kelly Mosaic Wall Board in applications where the public awareness is desired. They install informational placards adjacent to the panels to inform the public about the benefits of Kelly Green Board, LLC's products.
